News

The objective of the TRANSIT project is to create a focused work based training kit for technically focused middle management in SMEs. The project aims to develop work-based competences necessary for managing the transition to Industry 4.0.

The recent COVID-19 pandemic, has shown us that competences like openness to change, adaptability and adaptive thinking and also virtual collaboration, emotional intelligence, problem solving and management of people in the New Age, are vital for the survival of SMEs.

The TRANSIT project will provide SME employees with a training kit which will enhance innovation and motivation, as key elements of success: maximizing the ability to bring out the best of the workforce, inspiring to innovate and optimizing the use of HR potentials.

Trabag Ltd (Hungary), coordinates the project while the other European partners are:

- NUI Galway (Ireland)
- Chamber of Commerce and Industry of Slovenia – Institute for Business Education (Slovenia)
- Weople (Portugal)
- KISMC (Bulgaria)
- IDEC (Greece)
- ARTO (Hungary)
- Robot-X (Hungary)

Notable accomplishments/Outputs

Output 1: The first intellectual output of the project is a Transversal skills analysis for Transitions Management, which also includes a Catalogue and competence matrix. Given the fact that the successful transition to the new industry model is crucial, as well as addressing the challenges of the near future's job market, the results of this output represent valuable information for most companies and managers, regardless of their specific field, industry or country of operation.

You can find the Desk research report, the online questionnaire analysis and the summary of interviews in the project's webpage.

Output 2: The 2nd output of the project, which is currently being developed, is a triple training kit, which includes a training guidebook, a methodology and an online educational platform. The kit will improve the way companies approach the management of change, transition and adaptation to Industry 4.0.

The training kit is going to be applied in all partner countries, so stay tuned!
