

## Hungary, TREBAG

The venue of the multiplier event was the Central Hungarian Innovation Centre which perfectly suited the conception of the project. The aim of the conference was to provide the invited SMEs with a comprehensive overview of the human resource development activities that should precede the technological change while also giving them an idea of the steps to be taken for the transition to Industry4.0. Managers, decision makers and HR professionals of SMEs formed the basis of the audience. The invited speakers represented various professional fields related to Industry 4.0 and included academics, managers of the Industry 4.0 centre of Budapest University of Technology and Economics, Hungarian market leaders in 3D printing and training professionals. The overall evaluation of the event was 8,9 – the participants gained plenty of new information, ideas and attitudes.
